Greetings from YenePOYA Medical College , Mangalore

It gives us immense pleasure to invite you to 'YEX-FIX'-2015 , a comprehensive programme on external fixators. External fixators have been a boon ever since they were designed and have saved many limbs and lives. The advances made in bioengineering, have made the application of external fixators scientifically precise. The biomechanical principles are well understood. As a result of this the indications have been extended to a variety of orthopaedic conditions. This CME is organised to enlighten the fraternity on the present status of external fixation.

We look forward to your participation and hope that you will be benefited by this CME.

**HIGHLIGHTS OF CME**
